

# LIFE OF A SMARTPHONE

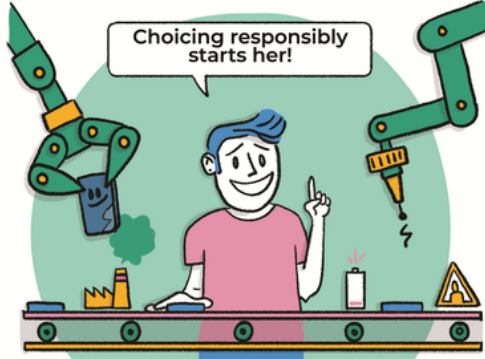

## Smarter choices

Ever wonder what your phone goes through, from birth to retirement?

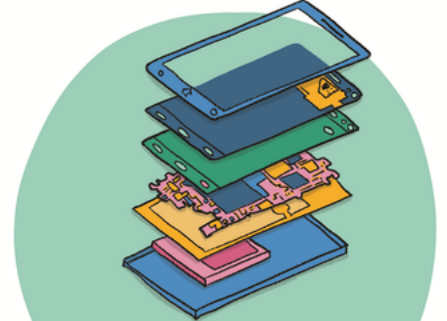

Let's follow Smarty the smartphone and learn how YOU can make a difference!

Choosing responsibly starts her!

Smarty is made with rare minerals, energy, and lots of labor.

Choose phones made with recycled materials or designed to be repaired, such as modular smartphones! Their independently replaceable components reduce repair costs and waste.

Pick me only if you really need me!

Consider refurbished models: they work great and save resources!

Accidents happen. But don't toss it!

Repair your phone instead of replacing it. A new screen is cheaper than a new phone!

## REPAIR SHOP

What can I repair for you?

You can contact a repair technician: they will refurbish it for you. What's more, with the repair bonus, it will cost you €25 less!

[More info on the last page.](#)

Is Smarty getting old?

It's not the end.

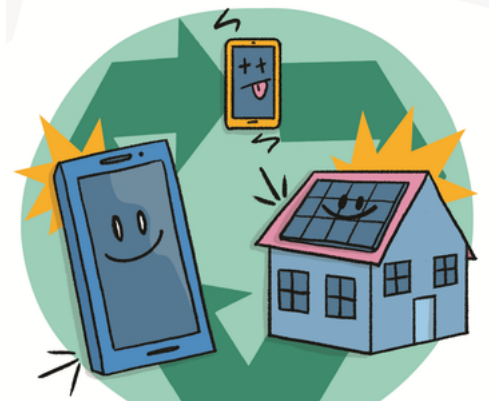

Fight planned obsolescence: delete unused apps, upgrade the OS, replace the battery!

WAIT!

I still have value!

You can take it to a recycling collection point, return it to the store or operator you bought it from, resell it, or give it away!

Sustainable choices extend Smarty's life and help the planet!

## TEE & SMARTY GUIDE YOU

Need to know a little more? We'll explain it simply.

### Repair Technicians

Broken phone, game console not working, or a squeaky bike?

Repair technicians bring your items back to life. Their job: diagnose the problem, replace the faulty part, and extend the lifespan of your devices. By choosing them, you save money, reduce waste, and support professionals near you.

### The Repair Bonus

Repairing: a simple, useful, and eco-friendly good deal!

With the **repair bonus**, it's simple: bring your item to a certified QualiRépar repairer, and a discount (from €10 to €60) will be directly deducted from your bill, with no paperwork required.

Phones, household appliances, computers, game consoles, electric bikes, clothing, shoes... many items are eligible. No paperwork, and the discount is deducted directly from your bill (item out of warranty and used normally).

Result: you **save money and help the planet** - less waste, fewer CO<sub>2</sub> emissions.

### Reuse Centers & Recycling Centers

Reuse centers give objects a **second life**.

You can **donate or buy** furniture, clothing, books, bikes, or appliances **at low prices**. Items are sorted, repaired, or transformed before being put back into circulation.

Result: less waste, more reuse, and great deals for everyone. These places encourage more responsible consumption and create local, community-based jobs.

Buying or donating at a reuse center is eco-friendly, smart, and supportive. Because... objects often have more than one life to offer.
