

REPper Pledge

Standing for Sustainability, Empowerment, and the Right to Repair

As a business committed to a more sustainable, just, and circular economy, we proudly pledge to uphold and promote the values of repair, reuse, and consumer empowerment.

Support learning
and skill sharing
**We empower our
community by
sharing repair
knowledge through
guides, events, and
partnerships.**

Promote repair
culture
**We actively support
and encourage repair
as a smart,
sustainable choice.
We help shift
attitudes from
throwaway to fix-it.**

Design for
repairability (if
applicable)
**We design or select
products with longevity
and repairability in mind
—making parts, tools,
and knowledge
available.**

Extend the life of
my belongings
**When things break, I
will try to repair
before replacing. I
will reuse and
repurpose to reduce
waste.**

Offer repaired and
refurbished goods
**We provide quality
repaired and
refurbished items,
helping to reduce waste
and extend product life.**

Advocate for the Right
to Repair
**We support policies and
legislation that ensure
consumers and
independent technicians
can access what they
need to fix their
products.**

Engage and educate
our customers
**We inform and empower
customers with
transparent info on
repairability and the
benefits of repair.**

Commit to
sustainability and
waste reduction
**We work to minimise
our environmental
footprint through
circular practices,
reducing what ends
up in landfills.**

By signing this pledge, we reaffirm our role
in building a future where repairing is the
norm—not the exception.

My REPper Pledge

For a Sustainable, Empowered, and Repair-Friendly Future

As a citizen committed to sustainability, reducing waste, and protecting our right to fix what we own, I pledge to take meaningful action and be part of a global movement toward repair and reuse.

Learn to repair

I will invest time in learning how to repair everyday items such as electronics, clothing, furniture, and appliances.

Extend the life of my belongings

I will care for my belongings to delay the need for replacement.

Learn to repair

I will seek out guides, workshops, or community repair spaces and share what I learn.

Choose repaired or repairable objects

I will prioritize buying products that are designed to be repairable or have already been repaired.

Support the Right to Repair movement

I will stand up for policies that give everyone access to the tools, parts, and manuals needed to repair.

Engage my community

I will encourage friends, family, and neighbours to repair what they can.

Extend the life of my belongings
When things break, I will try to repair before replacing. I will reuse and repurpose to reduce waste.

Choose repaired or repairable objects

I will avoid disposable or intentionally hard-to-fix products whenever I can.

Reduce waste and protect the planet

Repairing is not only cost-effective — it's an act of care for the planet and future generations.

Engage my community

I may join or help organise local fix-it events or share repair knowledge in my community.

Reduce waste and protect the planet

I understand that every item I repair helps cut down on waste and conserves natural resources.

Support the Right to Repair movement

I will sign petitions, support organizations, and speak out for repair-friendly laws.

By signing this pledge, I commit to being part of a movement that values knowledge, community, and sustainability. Together, we can shift our culture from throwaway to repair-first.

My REPper Pledge

For a Sustainable, Empowered, and Repair-Friendly Future

As a public institution committed to sustainability, circular economy principles, and the empowerment of our communities, we pledge to take the lead in promoting repair culture and protecting the public's right to repair.

Lead by Example

We commit to incorporating repair and reuse practices into our own procurement, maintenance, and waste management systems.

Lead by Example

We will prioritize repairable, modular, and durable products in our purchases to extend the life of public assets.

Support learning and community repair
I will seek out guides, workshops, or community repair spaces and share what I learn.

Promote circular economy & Reduce waste
We will measure and report progress toward waste reduction and reuse goals.

Support the Right to Repair movement

I will stand up for policies that give everyone access to the tools, parts, and manuals needed to repair.

Support learning and community repair

We will support and promote repair education in our region by:

- Facilitating or funding public repair workshops and fix-it clinics
- Partnering with schools, libraries, and community centers to offer hands-on learning opportunities
- Helping citizens access resources and training to learn how to repair

Promote circular economy & Reduce waste

We will work to reduce the volume of items sent to landfill or incineration by encouraging repair, reuse, and refurbishment.

Ensure access to repair

We will avoid contracts or purchasing decisions that limit repairability or impose proprietary restrictions.

Champion the Right to Repair

We will support regional, national, and international policies that uphold the right of individuals and independent repairers to fix their products.

Champion the Right to Repair

We may publicly support legislation or endorse campaigns that protect consumer repair rights and reduce planned obsolescence.

Ensure access to repair

We will advocate for public access to spare parts, repair manuals, and diagnostic tools—both for our own operations and for our constituents.

Empower local repair economies

We will encourage the growth of local repair businesses and social enterprises by:

- Offering small business support or grants
- Reducing regulatory barriers
- Promoting awareness of local repair services

Prioritise environmental and social responsibility

We will embed these values into our public policies, procurement strategies, and sustainability plans.

Prioritise environmental and social responsibility

We recognize that repair is essential to fighting climate change, conserving resources, and promoting economic justice.

By signing this pledge, we affirm our responsibility to serve the public interest—not only by managing public resources wisely, but by inspiring a culture of care, creativity, and resilience through repair.
