

LIFE OF A T-SHIRT

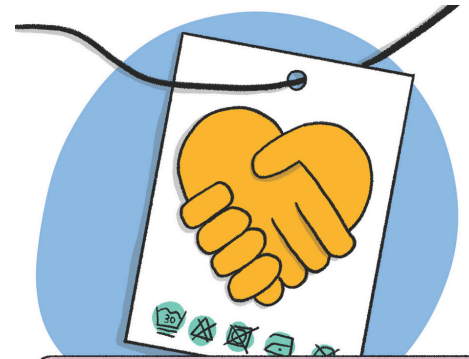

Smarter choices

Want to know how to best care for your clothes?

Making me uses water, energy, and sometimes exploits workers.

Support brands with ethical, transparent supply chains and organic fabrics!

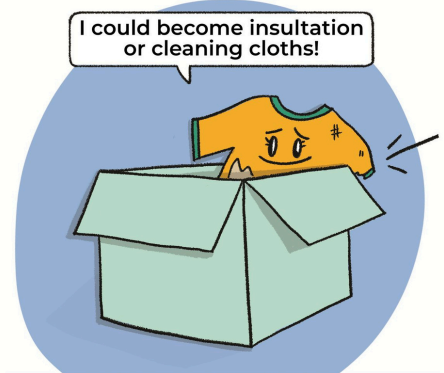

Buy less, choose better. Invest in quality items that last.

Proper care extends clothing life and reduces energy use.

Mend it, patch it, or upcycle it into a bag, rag, or new design!

Still wearable? Donate! Not wearable? Recycle!

You can also visit a reuse center, which can help you find out how to give Tee a second life!

More info on the back page.

Your thoughtful choices help fight fast fashion and waste!

TEE & SMARTY guide you

Need to know a little more?
We'll explain it simply.

Repair Technicians

Broken phone, game console not working, or a squeaky bike? Repair technicians bring your items back to life.

Their job: diagnose the problem, replace the faulty part, and extend the lifespan of your devices. By choosing them, you save money, reduce waste, and support professionals near you. Some are certified QualiRépar: this means you get an immediate discount thanks to the repair bonus.

Find a certified QualiRépar repairer: ecosystem.eco

The Repair Bonus

Repairing: a simple, useful, and eco-friendly good deal!
With the repair bonus, it's simple: bring your item to a certified QualiRépar repairer, and a discount (from €10 to €60) will be directly deducted from your bill, with no paperwork required.

Phones, household appliances, computers, game consoles, electric bikes, clothing, shoes... many items are eligible.

No paperwork, and the discount is deducted directly from your bill (item out of warranty and used normally). Result: you save money and help the planet - less waste, fewer CO₂ emissions.

Reuse Centers & Recycling Centers

Reuse centers give objects a second life.
You can donate or buy furniture, clothing, books, bikes, or appliances at low prices. Items are sorted, repaired, or transformed before being put back into circulation.

Result: less waste, more reuse, and great deals for everyone. These places encourage more responsible consumption and create local, community-based jobs.

Buying or donating at a reuse center is eco-friendly, smart, and supportive. Because... objects often have more than one life to offer.
